PROFILE

DevOps Engineer with 7 years of experience in designing, automating, and optimizing mission-critical deployments in AWS, Azure, and Google Cloud environments. Skilled in managing containerized workloads on Kubernetes (EKS, OpenShift) and implementing CI/CD pipelines using Jenkins, GitHub Actions, and GitLab CI. Hands-on expertise in Infrastructure as Code (Terraform, Ansible, Helm) with a strong focus on scalability, monitoring, and cost optimization. Recognized for strong problem-solving skills, delivering production upgrades, and ensuring operational excellence in fast-paced environments.

SKILLS

- **Cloud Platforms:** AWS (EC2, S3, EKS, IAM, CloudFormation, Lambda, RDS, CloudWatch), Azure, GCP
- **Containers & Orchestration:** Docker, Kubernetes (EKS, OpenShift), Helm
- **CI/CD Tools:** Jenkins, GitHub Actions, GitLab CI, ArgoCD
- **Infrastructure as Code:** Terraform, Ansible, CloudFormation
- **Monitoring & Logging:** Prometheus, Grafana, ELK Stack, Splunk
- **Version Control:** Git, GitHub, GitLab, Bitbucket
- **Scripting & Programming:** Bash, Python, YAML
- **Other:** Agile/Scrum, JIRA, ServiceNow, PagerDuty

EXPERIENCE

Senior DevOps Engineer | [Persistent System Ltd.] | [03/2021 – Present]

- Designed and managed **production-grade Kubernetes clusters** (EKS & OpenShift) supporting 20+ microservices across multiple environments.
- Automated **CI/CD pipelines** with Jenkins and GitHub Actions, reducing deployment time from hours to minutes and enabling **daily production releases**.
- Implemented **infrastructure automation** using Terraform and Ansible to standardize provisioning across AWS and Azure, ensuring reproducibility and compliance.
- Deployed monitoring solutions with **Prometheus + Grafana** and integrated alerts with Slack/PagerDuty, improving incident response time by **30%**.
- Spearheaded **cloud cost optimization initiative**, leveraging AWS Trusted Advisor and auto-scaling policies to achieve **20% cost savings**.
- Partnered with security teams to integrate **SAST/DAST scans** in CI/CD workflows and enforce IAM least-privilege policies.
- Actively worked on **resolving real-time JIRA cases** related to pipeline failures, cluster issues, and cloud incidents, ensuring **99.9% uptime SLA** for business-critical systems.
- Successfully led **Production upgrade (NZ-OPS upgrade 11.2.3.5)**, managing end-to-end planning, execution, and rollback strategy.

DevOps Engineer | [Index infotech] | [10/2017 – 01/2021]

- Migrated legacy monolithic applications into **Docker-based microservices architecture**, enabling horizontal scaling and faster rollouts.
- Led the design and implementation of **multi-cloud strategies** across AWS, GCP, and Azure for disaster recovery and vendor flexibility.
- Developed **Helm charts** for standardizing deployments across environments, reducing configuration drift.
- Automated **database upgrades and patches** with Ansible playbooks, minimizing manual intervention and downtime.
- Collaborated with development and QA teams to establish **shift-left testing** using containerized test environments, cutting defect leakage into production by **25%**.
- Documented **runbooks, playbooks, and post-mortem reports** to improve knowledge sharing and operational efficiency across global teams.

EDUCATION

Savitribai Phule Pune University
Master of Computer Application

Pune, India
2015–2018

Shivaji University Kolhapur
B.sc (Computer Science)

Kolhapur, India
2012–2015

CERTIFICATIONS

- Certified Kubernetes Administrator (**CKA**)
- Netezza IBM Certified Administrator – **Netezza Performance Server V11.x**
